

INTRODUCTION

Lago Martiánez is one of the most wonderful natural attractions in all of Tenerife. It is a delightful swimming complex consisting of waterfalls and dozens of large lakes, which is filled from the ocean. It is all extremely clean, and you are able to hire comfortable sunbeds and sunshades.

There are waterfalls, caves to swim through, and a giant fountain spurting water out to an incredible height.

There are many places to buy good tasting meal. One of them is a bar, which looks like a ship. It is placed on an island in one of the pools, where you can buy a nice cool drink.

The swimming pool complex of Lago Martiánez is like a setting from a James Bond movie: seven pools, including a 15,000 m² artificial lake, which has an island in its centre, below where the town's casino is located.
